Washington, D. C.

COLD STORAGE REPORT
AS OF DECEMBER 1, 1942

Released:
December 14, 1942
2:00 P. M. (EWT)

Reports to the U. S. Department of Agriculture on perishable food items held in cold storage warehouses and meat packing plants on December 1, 1942, indicated substantial withdrawals during November of manufactured dairy products, eggs, frozen fruits and vegetables and lard. Cold storage holdings of apples, however, were increased during the month by nearly 10 percent of the November 1 stocks. There was a fairly heavy into-storage movement of poultry and moderate increases in stocks of frozen and cured meats.

Creamery butter holdings totaling 45.6 million pounds were the lowest for December 1 since 1932. Net withdrawals during November were 40.4 millions pounds. The net out-of-storage movement of all varieties of cheese during the month totaled nearly 42 million pounds, which left December 1 stocks at 153.4 million pounds.

Holdings of shell eggs were reduced by 2 million cases and stocks of frozen eggs were lowered by 54.2 million pounds, or a total reduction during November equivalent to 3.4 million cases.

Holdings of frozen poultry reached 193 million pounds, a new high point for December 1.

Stocks of frozen and cured beef totaling 133 million pounds were the heaviest for December 1 since 1936. The increase during November was 16 million pounds. Frozen and cured pork stocks were increased by 24.7 million pounds during the month and December 1 holdings totaled 282.1 million pounds.

Lard and rendered pork fat holdings were reduced to 54.6 million pounds, which is the lowest quantity on December 1 since 1937.

Lamb and mutton stocks totaling 26.1 million pounds were the highest for any period since 1920.

Cold storage holdings of apples were the equivalent of 35.7 million bushels, the heaviest since December 1, 1937.

The occupancy of public cold storage warehouses on December 1, 1942, was reported at 65 percent for coolers and 77 percent for freezers. This indicates a significant drop in cooler occupancy but only a slight easing in the freezer situation.

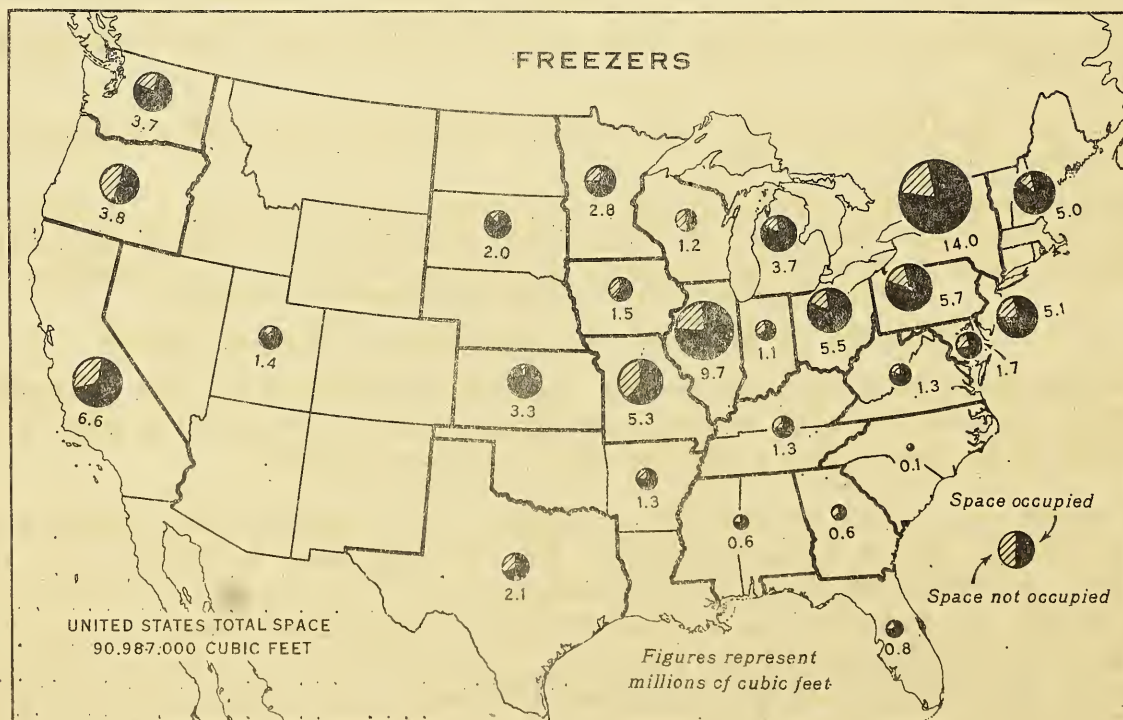

Contents of December 1, 1942, Cold Storage Report

Separate tables appearing in this report represent holdings of the following groups of commodities on hand in cold storage warehouses and meat packing plants on December 1, 1942, with comparisons for previous related dates:

^{1/} 1 bushel of apples in storage estimated to require 2.3 cubic feet of net piling space.

^{2/} Preliminary.

^{3/} No storages reported occupancy.

FRUITS AND VEGETABLES

Stocks of fresh apples in cold storages on December 1, 1942, were reported at the equivalent of 35,862,000 bushels. This quantity is 4,427,000 bushels in excess of the December 1, 1941 holdings and 3,074,000 bushels above the December 1, 1937-41 5-year average. Frozen fruit holdings were 204,551,000 pounds and frozen vegetable stocks 115,341,000 pounds. Fruits were 17,837,000 pounds heavier than a year earlier and 53,768,000 pounds above average. Frozen vegetables totaled 14,901,000 pounds more than a year ago.

(See table on page 10 for December 1, 1942 holdings by geographic divisions)

DAIRY AND POULTRY PRODUCTS

Stocks of creamery butter on December 1, 1942, were down to 45,593,000 pounds. This is the lowest quantity for December 1 reported since 1932, and was 106,891,000 pounds less than that on hand December 1, 1941, and 61,745,000 pounds less than the 5-year (1937-41) average. Net withdrawals during November were 41,398,000 pounds compared with 34,151,000 pounds during the same period a year earlier, and 35,410,000 pounds for the average. In view of the apparent accelerated out-movement a freezing order was issued during the latter part of November.

Cheese stocks were reduced by nearly 42 million pounds during November. Although stocks reached an all time high on August 1, the heavy withdrawals during subsequent months have reduced current holdings to a more nearly normal level. The 153,440,000 pounds on hand December 1 was 35,562,000 pounds below a year ago but 16,369,000 pounds above average.

Stocks of eggs were reduced to 1,115,000 cases of shell and 126,094,000 pounds of frozen or a total case equivalent of 4,478,000. Holdings of shell were the lowest on record for December 1 with net withdrawals totaling the equivalent of 3,148,000 cases. This heavy withdrawal is due to utilization of back-log supplies, for drying. This back-log has now been reduced to 376,000 cases of shell and 22,192,000 pounds of frozen, according to incomplete returns from egg dryers.

The poultry movement into-storage slowed down during November. The increase during the month was 31,947,000 pounds. Stocks were the highest on record for December 1, totaling 192,958,000 pounds. Commitments of dried eggs for future delivery to F.S.C.C. during December converted to case equivalent, are 1,576,000.

(See table on page 11 for December 1, 1942 holdings by geographic divisions)

1/ Frozen eggs are converted on the basis of 37.5 pounds to the case.

2/ SPECIAL NOTE: 83 percent of total frozen eggs reported as of December 1, 1942, were classified as follows: Whites 25 percent; Yolks 16 percent; and mixed 59 percent.

MEATS AND LARD

The rate of accumulation of all frozen and cured meats during November was significantly below normal. The net into-storage movement was 49.3 million pounds compared with 72.6 million during November 1941 and 85.2 million pounds for the 5-year 1937-41 average. Total volume was made up as follows: 133 million pounds of frozen and cured beef, 282.1 million pounds of frozen and cured pork, 26.1 million pounds of frozen lamb and mutton, and 71.9 million pounds of miscellaneous meats and trimmings. Beef stocks on hand December 1, 1942, exceeded those of a year earlier by 18.6 million pounds and the average by 61 million pounds. On the other hand, stocks of pork were 68.2 million below those of a year ago and 57.3 million below average. Lamb and mutton holdings were unusually high, being 19.7 million pounds heavier than December 1 a year ago and 22 million above average.

Lard and rendered pork fat holdings were down to 54.6 million pounds. This quantity is 121.9 million pounds less than a year earlier, and 66.7 million pounds less than average.

(See table on page 11 for December 1, 1942 holdings by geographic divisions)
